MONEY, STOCKS AND GRAIN

Among New York Specialties Evansville and Terre Haute Rose 11 Points.

Coal Shares Continue to Improve with Reading Leading-At Indianapolis Trade Shows a Good Volume with Prices Steady.

THE BOND MARKET.

Railroad Issues More Animated, with Only a Few Features.

At New York, yesterday, money on call was firmer at 4@5 per cent., the last loan

being made at 5, closing offered at 5. Prime mercantile paper, 41/2 @6 per cent. Sterling exchange was quiet but steady at \$4.861/2 for sixty-day bills and \$4.881/4 for

Total sales of stocks were 192,067 shares, including the following: Atchison, 5,900; Erie, 3,100; Missouri Pacific, 4,400; New England, 24,300; Reading, 34,500; Richmond & West Point, 7,900; St. Paul, 16,000; Texas

Pacific, 4,600; Western Union, 4,900.

The stock market was again principally professional yesterday. The feeling in the coal snares was better, and Reading still led the list in point of activity and gathered strength as the day wore away. The most prominent feature of the day was the revival of interest in Richmond & West Point. Among the industrials, Distillers, General Electric, Lead and Sugar were paid most attention to, rising about 1 per cent., but later sinking into the general duliness and stagnation. The open-ing was generally at lower figures. Among the specialties which scored handsome gains were Evansville & Terre Haute, which rose from 140 to 151, Minneapolis & St. Louis preferred and New York & Northern preferred. The Gould stocks were prominent in early dealings for strength. but later in the day, all displayed weakness, Western Union in particular. The close was quiet but firm, with most stocks

only slightly changed. Railroad bonds were still more animated, but there was less feature than usual of late, the animation of a few issues being the only prominent feature.

Government bonds were dull and firm. State bonds were dull and featureless. Closing quotations were: Four per cent. reg. 114 Louis. & Nash.... 6718 Four per ct. coup. 11514 L. & New Albany. 2334 Facine 6's of '95. 107 Missouri Pacific... 6058

For the cities outside of New York

the clearings were \$473,565,378, with an increase of 11.2 per cent.

GRAIN AND PRODUCE. Volume of Trade Highly Satisfactory-Cereals

Will Decline Unless Frost Comes. The volume of trade in all departments is highly satisfactory, with but few changes in either of the markets. Sugars. coffees, and, in fact, all staple groceries are firm in tone. The provision market is weak, dealers speaking of it as being "Armour-plated," as the prices rule to suit the will of the Armours. Poultry steady and firmer. Eggs steady and unchanged in price. Apples have advanced. Some fine New York fruit is on the market, and yesterday sold at from \$4 to \$4.50 per barrel. Common stock has advanced. Watermelons are in light supply, and are again selling at \$15 to \$18 per 100. Sweet pota-

The grain market, Fred P. Rush says, is a waiting one. If the next two weeks should continue warm, with light showers, corn will go lower, and other cereals will decline with it. Should there be a frost, directly the reverse will be the case. The attendance on 'Change yesterday was small and the bidding slow. No change was shown in the prices. Track bids were:
Wheat—No. 2 red, 7012c; No. 3 red, 644@ 64 2c; No. 4 red, 57c; rejected, 50@55c; wagon

toes in abundant supply, and go off 50 cents

BUSINESS AT A STANDSTILL

Wheat Strengthened a Little by Heavy Exports and Short Local Receipts.

All Grain, Except Corn, Closed with a Slight Gain, While Pork, Ribs and Lard Moved Up Several Points on Heavy Buying.

TRADING AT CHICAGO.

Stagnation Likely to Continue Until Cholera Scare Abates.

CHICAGO. Sept. 9 .- It was almost stagnation to-day on the Chicago Board of Trade. The general feeling seemed to be that while the cholera shadow is hanging over the market there can be little activity and no material improvement. Wheat closed with about 4c gain, corn with 40 loss; oats about 'so higher and provisions moved up several points. Wheat was strengthened a tle by heavy exports, the falling off in the local receipts, the small proportion which graded contract, and was extremely slow all through the session. The traders seemed to be absorbed watching the progress of the cholera. The bulletins from New York were closely studied. Outside trade seemed to have come to a standstill, and commission-houses complained of unusual apathy. There was no disposition to raid, and the values held steady. The entire fluctuation for the day covered a range of only about 42c, with business of light volume. There was a report from the Northwest that farmers were storing their wheat rather than sell at present

Corn was weak and lower early, mainly on the absence of frost last night and reports that the crop was maturing rapidly and would soon be out of danger. This led to free selling of long corn, and short sellers were pretty active for a time, causing a loss in price of 4c from early figures. Later, shorts took advantage of the break to cover, and, as there was not much for sale, prices quickly stiffened. A firm ripple in wheat about the same time helped the corn market, and the early decline was recovered; but the cereal turned weak again during the last hour.

Oats sympthized strongly with corn, following that cereal closely all day. There was a fairly good trade in provisions, without any violent action in prices. The lowest prices were made on a little dip with grain markets soon after the opening, when the cholera disputches were received. Buying by Cudahy in ribs, and by the Packing and Provision Company, Angio-American Company, became more bullish, and prices advanced steadily. Compared with last night pork is 174c higher, lard is from .24c to .5c up, and ribs from .74c to .10c.

These was good demand for vessel room, and not many boats offered. Rates were firmer at 20 for wheat, and 2024c for corn to Buffalo. Estimated receipts for to-morrow are 386 cars of wheat, 538 corn, 325 oats, and 10,000 hogs. The leading

The Davis Brothers.

New York Advertiser. Richard Harding Davis's new book will be published in a day or two, but those who look for "Gallagher" or "Van Bibber" in it will be disappointed. It tells the story of the great West as seen through Mr. Davis's vivid spectacles. Davis has just returned from England with a lot of literary material. In spite of his advice and his suggestion to his younger brother that banking or the railroad business give fairer promises of pethe younger Davis refused to heed these hints. He has taken his plunge and has had a batch of short stories accepted by some of the magazines, so that before very long it is likely that we shall see upon the field, but otherwise they have to dry in the news-stands copies of Rebecca Harding barn. They should be threshed on the floor Davis's short stories, flanked on either side by the short stories of her two sons. That will be something unprecedented in literary history, although Anthony Trollope's novels used to be sold along side the writings of his mother.

The Way It Looks.

Philadelphia Times. If some of the Iron Hall supremes didn't they appear to have got their hooks in.

DUN & CO.'S WEEKLY REVIEW

Successful Handling of Cholera at New

York Tends to Restore Confidence.

Decided Improvement in the Iron Trade, and

Better Business Expected After the Com-

ing Meeting of the Steel Men.

NEW YORK, Sept. 9.-R. G. Dun & Co.'s Weekly Review of Trade says: Last week's semi-pante in stocks and grain has been followed by a more confident feeling about cholera, as it is seen that the pestilence is thus far confined to incoming ships by national regulations, which all officials are now respecting. Stocks have advanced about 75 cents per share on the whole though in other markets the alarm disclosed weakness which still continues. Meanwhile the general condition of industries and trade throughout the country is not only remarkably good, but improving perceptibly from week to week, although the exports of merchandise are not

yet large enough to prevent some exports

of gold. Decided improvement is seen in the line of the iron trade, and Pittsburg glassworks are resuming and the hardware trade is good. Prospects are excellent at Cincinnati, commission merchants unusually prosperous and trade in tobacco leaf strong. Business at Cleveland has improved and is excellent, with larger demand for money. At Detroit business in some lines is 10 to 20 per cent. greater than last year and prospects are iavorable. General trade at Chicago is larger than a year ago, with favorable crop prospects. Receipts of lard, butter and cheese show improvement over last year; of wheat a sixth, of wool a third and of hides and flour one-half, while in corn a decrease of a third appears, and a large decrease in rye and barley, with small de-crease in other articles. Milwaukee trade is fairly good, tobacco having been little damaged by frosts, while corn is kept back

At Minneapolis crop prospects are fair, lumber is active and strong, and general trade good. At St. Paul trade improves. with brighter prospects, and while average crops are expected, higher prices are also judged probable. At Omaha trade is active in groceries and dry goods, and fair in other branches. St. Louis reports strong trade and railroads taxed to carry grain. At Kansas City trade is improving, receipts of cattle and grain being heavy, and at Denver business is good. At Little Rock business is satisfactory, though merchants buy conservately. At Louisville trade im-proves, and at Nashville, as well, crop prospects being better. At New Orleans trade is somewhat improved, but is not up to expectations. Sugar is strong, rice unsteady and money stiff, though in ample

sappiy. The iron industry grows more active; nearly all works are full of orders and the output is now heavy. Nails have advanced 10c per keg, but some weakness appears in prices of structural and plate-iron. A meeting of rail-makers next week may give that branch a chance for larger business. Copper is uncertain, with sales at 11 20. Business in tin has been checked by speculation and lead is weaker at 4.15c. The expected war between the Pennsylvania and Reading adds to the dullness in coal. Boots and shoes are in great demand. Eastern shipments, according to the Shoe and Leather Reporter, being 84,826 cases, against 78,-317 last year. Cattle receipts at Chicago for the year are 13 per cent. larger than last year, and receipts of all live stock there in August were nearly 25 per cent. larger. All textile-works are remarkably busy, and in dry goods a better demand is seen for medium grade worsteds and a demand in excess of supply for plain wool goods, while prices of cottons are very firm, some advancing.

Wheat has sold at 7712c, and, excepting in two days in 1884, no lower price has ever been recorded here. Western receipts have been 5,700,000 bushels in four days, against 1,700,000 bushels Atlantic exports. Oats are half a cent higher, but corn is much lower, with brightening crop prospects at the West. Coffee is an eighth lower. Cotton has advanced a sixteenth during the week, although the Financial Chronicle makes the last crop 9,038,000 bales, and the decrease in acreage this year only 12 per cent. With restricted exports of products at present, foreign exchange is steadily strong, but the treasury has put out of new notes \$200,000 more than it has added to its stock of gold and silver and the money markets throughout the country are amply supplied. Collections in all quarters are very fair for the season. It is expected that some more gold will go out this week, but no apprehension appears as yet on account of this unusually continued movement because the supplies of currency available are remarkably large, and the interior markets appear to demand less money from sea-board centers than is usually

demanded at this season. The business failures occurring throughout the country during the last seven days number for the United States 146 and for Canada 33, or a total of 179, as compared with totals of 176 last week and 180 the week previous to the last. For the corresponding week of last year the figures were 214, representing 187 failures in the United States and 27 in the Dominion.

Profit in Beans,

Missouri Agriculturist. A good bean crop is about as valuable at a good potato crop. The high prices realized from the early string and shell beans generally pay for all labor and expense of the crop. Where several acres are planted with the best beans all the green pods that are needed by the near-by market can be picked and yet only a slight percentage of the whole will be picked. The rest, however, are not wasted. Dry beans are very valuable. They are becoming staples which are used in every household. The large marrows and kidneys produce abundant crops, and they are quoted the highest in the market all through the winter.

dealers at so many pounds to the bushel and the price for a bushel has averaged in New York for many years \$1.30. This without doubt yields a good profit to the The field bean culture needs high manuring, good soil and plenty of cultivation. Like the potato, they improve immensely through an intense system of cultivation. From twenty to forty bushels of beans to

the acre after green ones have been picked

The dried beans are generally sold to

for the early markets will not make a bad The general method adopted is to plant the beans in hills or drills, but for many years a double crop has been obtained by drilling them thickly at first. When string beans are ripe early in the season pick off all those on the vines that are to be thinned out. After the first picking the vines can be pulled up excepting those in the hills. This will give the other vines more room and a better chance to mature. High manuring and thorough cultivation are necessary when green and dried beaus are thus to be taken off one field. The soil must be very rich in nitrogenous material or else neither crop will succeed well. If the soil is not very good it is better only to plant the beans in separate hills for winter use. They should not be planted thick enough to require weeding out. When the pods are well ripened the crop should be pulled by the hand or cut off by a machine for this purpose. They should be thrown

not be left in contact with the earth for any length of time. When the leaves and pods are fairly dry take them up and spread them on a plat-form of rails in the barn. By using rails the air can circulate through the mass and keep them from heating or molding. If they are dry enough they can be threshed immediately after being gathered from the and all of the beans gathered up and then put through the fanning-mill. Keep them clean and dry until ready for sale. If kept on hand for higher prices until midwinter see they do not heat or get worm-eaten.
